SUMMARY

Software Engineer – 3 years of professional experience – Available within 1 month

Python, Django, Flask, JS, Vue.js, React, Typescript

Versatile and adaptable, looking for new challenges in technical and demanding environments to keep on growing. Well-acquainted with the development and maintenance of software in a large team to deliver high quality products at scale. Confident to take on responsibilities and create innovative solutions with the client or the user satisfaction as priority. Easy-going and at ease to communicate with both non-technical collaborators and peers.
